Your Guide On The Inside

## **Right Now, You Are Doing Something Very Unique And Special That Most People Don't Do.**

You possess intuitiveness in taking steps in finding the way to have optimal health to handle your life's daily challenges successfully. Most people simply do not know where to begin, nor have the intuitiveness to take the leap of faith to get started in the process of turning around their health positively for maximum results.

But you do... Your first step has the 'potential' to change your health into a power house of success.

'Potential' alone will not be enough. You are probably not where you want to be in your personal health agenda, Right? If you are on 'top of your game', full of vim and vigor, one who never catches colds, and if you are energized to the max naturally, then this report is not for you. I researched and wrote this report for the person who deeply wants to succeed in building one's health resources to obtain a healthy lifestyle but cannot figure out how to make it happen.

It use to be that eating nutritionally, exercising, getting fresh air, and sunshine produced inner strength, stamina, a healthy body and mind. Puff! Those days are long gone. What happened?

Our health is spiraling down at such an alarming rate.

In a recent news article, written by “The Associated Press,” the United States spends more on health care than any other nation, yet we have less life expectancy than many other countries.

Our lives have become so-o **Stressful** that it is causing catastrophic health diseases. Scientists have confirmed that stress is a contributing factor in **every disease** from developing colds, heart disease, strokes, cancer, depression, and the aging process. Stress has become a toxic component in our bodies. Yikes!

Our life has become so jam packed and busy that we have developed extremely poor eating habits. From gulping down a meal at fast food places to grabbing a donut and calling it a meal, we are consuming too many fat and sugar calories for a healthy lifestyle. We are paying dearly with our lives for these poor eating patterns. Obesity and Diabetes are now epidemic diseases in the United States.

81% of Americans recognize that a healthy diet is very important. .. Only 20% eat nutritional healthy every day.

Did you know that we need **45** indispensable nutrients every day? That’s right, **45** essential nutrients every single day of our lives. We also require 10 servings of fruits and vegetables every day. Even with the utmost good intentions it is very difficult to maintain a well balanced healthy diet.

**So what does all of this have to do with reviving your health, restoring vitality, fortifying your immune system, while having a vibrant healthy outlook on life?**

**Everything.**

You see, the health problems you are experiencing can be easily resolved though pure organic vitamins and supplements.

What is needed for nutritional support to bridge the gaps in your life is from nature’s pharmacy-- organic, plant based phytonutrients.

Phytonutrients are disease fighting, health benefitting, naturally occurring plant molecules. Phytonutrients are organic elements found in plants. They are also found in fruits, vegetables, and their extracts. Phytonutrients are concentrated and are responsible for the color, hue, scent, and flavor of the vegetables and fruits.

Phytonutrients are certain organic components of plants, and these components promote human health and longevity.

Quite simply, phytonutrients are a major part that links and replenishes our bodies to lead a healthy and vibrant life.

But wait a minute! Are you already taking vitamins and supplements?

Today, vitamins are everywhere, right? There is not a store you go into without seeing them hanging out, in your face, and on the shelf ready to buy. That should be excellent news...But it is not.

Do you want to know the truth about most vitamins and supplements?

They are chemically massed produced, have inferior ingredients, they use synthetic pesticides, herbicides or fertilizers, and are jam packed with additives and fillers. You definitely are not getting any nutritional value from them and quite frankly you are throwing your money down the drain. Puff! Your money is swallowed up and you still feel miserable. So, what do you do? Usually everyone declares it doesn't work and stops taking them.

Ready for some more bad news? If you are already taking organic vitamins and supplements....Most organic farms are not truly organic. Numerous farms are not even certified as organic. One of the requirements to be certified 'organic' is that the farmlands must be free from synthetic chemicals for more than three years. The farms must be void of synthetic chemicals, antibiotics; food additives, irradiation, and the use of sewage sludge. Many organic farms are here today and gone tomorrow... See Ya Later Alligator!

### **Now to the Good News!**

There is a company that has been in business and 'Green' for over 70 years. Yes, that is correct over 70 years! Their belief in helping people obtain ultra health naturally is unsurpassed.

The vitamin and supplements are harvested on pure 'Certified Organic' farms (I'll tell you where they are located at a later date). The soil is always replenished naturally and no chemicals are ever used. Oh, by the way, the company *owns and maintains* over 6,400 acres of organic farmland.

The use of phytonutrients in the five color spectrum in the vitamins and supplements out surpasses all others...and has been beneficial in building a healthy foundation, gaining peak performance, and natural energy all day, triples the immune system, while promoting enhance brain memory and endurance levels.

All 45 essential vitamins, minerals, and nutrients are included.

They combine Nature with a dedicated scientific know how, to bring to the table pure uncompromised quality.

These are the quality of vitamins and supplements that everyone should be taking. How about you?

On top of all this, the company will pay and reward you for better health.

When was the last time Brand 'USELESS' paid you for buying their product(s)? Umm--I didn't think so.
